

NEW 11mm BACK BENDABLE FLEXIBLE BORDER TUBING

Allanson's 11mm Back-Bendable Flexible Border Tubing—Where Design Meets Innovation.

Engineered for precision, this 11mm tubing features unique back-bending design, creating smooth curves and seamless installations on any surface. Encased in vibrant colored jackets, its three static color options provide bold, uniform illumination with a durable build that ensures lasting performance. Whether enhancing architectural features or crafting striking displays, this tubing delivers unmatched versatility and brilliance.

DESIGN WITH LIGHT, BEND WITH EASE

Seamless Illumination

Delivers consistent, uniform lighting without dark spots for a flawless glow.

Efficient Heat Management

Features a 3-ounce copper LED ribbon for superior heat dissipation.

Uniform Illumination

Provides smooth, continuous light output for a flawless appearance.

Bold, Static Colors

Available in four static colors, & RGB encased in vibrant silicone jackets.

Durable Construction

Built with UV-resistant silicone for durability in harsh environments.

Easy Installation

Hassle-free, simplified installation that saves both time and effort.

FLEX WITH LIGHT

Backed by **Allanson's reliable service and support solutions** for a seamless experience **from installation to maintenance.**
