

DMX Sub-Controller

Your Essential Tool for Perfect Lighting Control

Allanson's ACL-SC-DMX Sub-Controller

Achieve powerful, precise lighting control with the **ACL-SC-DMX Sub-Controller**, featuring DMX512-A compliance for seamless integration with other DMX devices. Its single output channel allows easy RGBW color management with smooth dimming, fading, and dynamic color mixing.

Advanced DMX Control for Precise RGBW Lighting

-  **RGBW Control:**
Manage intensity, brightness, dimming, and fading through one output.
-  **Convenient LED Emulation:**
Confirms output LED colors during setup.
-  **Easy DMX Programming:**
Electronic channel setup removes the hassle of DIP switches.
-  **Built-in Protection:**
Overload and short-circuit safeguards ensure safe operation.
-  **Seamless Integration:**
Compatible with Allanson's and other DMX devices and supports daisy-chaining.
-  **Ideal for Indoor / Outdoor Applications:**
Engineered for versatile performance in both indoor and outdoor environments, offering durability and dependability in all conditions, rain or shine. Rated Protection Class IP65.

ENHANCE YOUR LIGHTING CONTROL TODAY

This sub-controller is designed for those who demand reliable, high-performance lighting control. Its advanced features, durability, and easy integration make it an essential addition to any professional lighting setup.
