DMX/SPI MASTER CONTROLLER

Master Control, Maximum Impact with Allanson's DMX/SPI Master Lighting Controller. Take your lighting projects to the next level with this all-in-one solution that combines power, precision, and reliability. Designed for large-scale installations, it streamlines programming, scheduling, and playback while delivering smooth, dynamic pixel-mapped displays. With intuitive controls, flexible connectivity, and reliable performance, this controller puts creativity and control at your fingertips.

THE ONLY CONTROLLER THAT DOES IT ALL

Multi-Function Controller

Combines DMX, TTL-SPI, and Boosted SPI in a single unit

5" Touchscreen LCD Display

Easy-to-use interface for simplified navigation, programming, and control.

DMX Protocol Compatibility

Integrates easily with DMX-based systems for flexible, complex setups.

Scheduling & Automation

Automates lighting programs by setting specific days, hours, and minutes. Adapts to daylight hours, events, or routine usage.

16 Output Channels

Supports intuitive installation with minimal configuration.

Hardkey Arrows

Durable physical buttons for reliable operation even in outdoor environments.

Pixel Mapping Compatibility

Seamless programming and control, for efficient pixel mapping and scheduling.

Boosted SPI Ports

Extends SPI signals up to 1,000 feet with Allanson's SPI Range Extender Receiver (sold separately), maintaining signal integrity over long distances.

ColorMix
Lighting Solutions by Allanson

Backed by Allanson's trusted support and reliable solutions for effortless setup and long-term performance.
