

LED retrofit

Lighting Solutions by Allanson

**NEW &
IMPROVED**

12V & 24V

12V & 24V Available

4000K

New Color Temperature

Other CCT available, MOQ required

Discover re-engineered LED retrofit, a true retrofit now available in 24V and 4000K color temperature, providing you a greater range of applications for all your signage needs. LED retrofit's unique construction generates a "bow-tie" illumination pattern that distributes light in a highly uniform pattern. It's brighter than leading competitors and lasts longer than fluorescent, reducing labor costs and increases throughput.

Optimal Light · Vibrant Image

- Quick and easy replacement of T12 HO lamps
- Insulated adaptors mount directly into existing sockets
- Diamond shape sturdy housing for wider light beam
- Aluminum structure for continuous heat dissipation
- Bright white LED colors
- Operating temperature: -40°C to +50°C
- Safe 12V & 24V system
