

SKYLINE RIGID BORDER TUBE

Field-Cutttable - With NEW Clear Strip For Unmatched Precision

Allanson's Skyline Rigid Border Tubing is engineered for installers who need reliability, durability, and the ability to adapt on-site. Our newest generation now features a **Clear-Cutting Strip**, giving sign pros a perfectly visible reference point to identify LED placement—**resulting in faster, cleaner cuts and a more seamless installation experience.**

CLEAR CUTTING STRIP (NEW)

A visible guide along the tube makes it **easy to locate LEDs and mark exact cut points**—**reducing guesswork** and ensuring every modification is clean and consistent.

DURABLE ALL-WEATHER CONSTRUCTION

UV-resistant polycarbonate housing and **IP67-rated construction ensure reliable performance**, resisting UV exposure, temperature changes, and demanding environments while **remaining fully compatible with dimming controls.**

TRUE FIELD-CUTTABLE EFFICIENCY

Take control of your install - Cut, match, and **install tubing lengths directly at the job site.** Perfect for retrofits, service work, and custom commercial signage builds.

HIGH-PERFORMANCE ILLUMINATION

Skyline delivers smooth, even illumination with **no hot spots, using high-quality polycarbonate housing** and translucent end caps to elevate brand visibility and enhance architectural lines.

Built For Installers Who Demand Quality & Accuracy

Experience the new Skyline Field-Cutttable Rigid Border Tubing with Clear Cutting Strip.
